WHY PARTNER WITH AWIR?

The Association of Women in Rheumatology advocates for access to the highest quality health care and management of patients with Rheumatic diseases. We believe in creating a strong network of women advocates that will support AWIR policy priorities at both the state and federal level.

Our advocates are working on the frontline of health care and have firsthand knowledge of the struggles our patients endure. To help provide support for our advocates we have crafted the tools and resources necessary to actively engage legislators and regulators around the country.

Advocacy support is available to help with issues affecting health care, providers, and Patients.
WHAT DOES AWIR DO?
AWIR advocates are working on the frontline of health care and have firsthand knowledge of the struggles our patients endure. As a means of support for our advocates, we have devised an advocacy campaign to provide advocates with the resources necessary to actively engage with legislators and regulators around the country. Together, we can make a positive impact on your life and the lives of your patients.

STATE AND FEDERAL ADVOCACY
The challenging health care environment greatly affects the way rheumatologists manage their practices. It can interfere with patient access to care and force rheumatologists to make difficult decisions. State legislatures are considering an increasing amount of legislation of impact to the rheumatologic community. In response, rheumatologists must be engaged at both the state and federal levels to protect their patients and their livelihood. AWIR focuses on educating legislators, government officials and the corporate community on the impact that policy/procedural changes may have to the patient’s quality of care and disease management options. AWIR also collaborates with patient organizations and other national societies to elevate awareness and provide a forum for an exchange of ideas, fostering a collaborative environment.
